Whittier, owner of the cottage on the small island, known as Twin Island, has put up four cords of ice this winter and will in the spring turn his cottage half around, put a piazza around three sides of it, clapboard and paint it up in fine style. While the north side of the lake is very beautiful and cottages have been built up and down its side, and there is a chance for many more, it is well to remember that the south side of the lake has many a fine location for cottages, although not on the line of the railroad, yet as handy to depot, church, store and post office. There is also a great opportunity to go back on the Merrill Hill and build cottages. This overlooks the lake and away to the White Mountains, and up and down the Connecticut valley. You get a beautiful sunrise and a glorious sunset, only a few minutes walk from the lake, which lays at the foot of this grand old hill; E. A. Whiting has a fine maple grove within 100 rods of the depot on a hill overlooking the lake, village, and all mountain scenery. No pen can picture a better chance to build, or finer scenery than here. Thirty cottages could be built in this grove.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address, F. J. These two tubs of butter were made from the same quantity of milk from the same cows.

How was it done? Here's the story in the words of a plain-honest, hard-working farmer and his wife.

"We had a water separator, and from twelve cows we made 96 lbs. of butter. The next week we used a No. 6 U. S. Separator and made 74 lbs. from the same cows in the same pasture without any extra feed. We made \$10.48 the first week after using the machine. We are very much pleased with it, and could not do without it now."

JOHN NEYLON, Mrs. NEYLON.

Are you using any gravity method to skim your milk? If you are, a

U. S. Cream Separator

will do for you what it did for the Neylons. Think what that means—a considerable daily saving in time and work of handling your milk—from 1/2 to 1/4 more butter than you are now getting, and better butter, too, that brings a higher price. You can't afford to put off looking into this matter another day—write us now for a free catalogue, which explains just what you want to know.
